This list should be used for bidding only and should not be disclosed to other parties. The areas included in this list are not indicative of the areas awarded HUBs through the bidding process.

Once the HUB process was complete, the disadvantage analysis was redone and areas that have remained in the list have done so either because:

- They were and have remained one of the 25 areas identified through our cold spot analysis;
- They were one of the areas covered by a hub which wasn't successful and subsequently was included in one of the 25 areas identified by our cold spot analysis or;
- They are one of the areas covered by successful hub bids receiving virtual wallets.
